Subject: Application for Junior Full Stack Developer Position

Dear Hiring Manager,

I am writing to express my interest in a Junior Full Stack Developer position. I am currently pursuing an Advanced Diploma in Computer Programming and Analysis at George Brown College and have developed a strong foundation in full stack development through academic projects and hands-on technical experience.

Throughout my studies, I have worked with technologies including JavaScript, React, Node.js, MongoDB, ASP.NET, SQL, Docker, Java, C#, and Python. I have built full stack applications using the MERN stack, worked on backend and frontend integration, and developed mobile applications as part of my coursework. My capstone project, the ABC Restaurant Human Capital Management system, has given me experience in building software features related to scheduling, payroll, employee workflows, and system planning.

Alongside my technical growth, my work experience in retail and customer-facing roles has helped me build strong communication, teamwork, and problem-solving skills. I am comfortable working in fast-paced environments and collaborating with others to complete tasks effectively.

I am eager to continue growing as a developer and contribute to a team where I can apply my technical knowledge, work ethic, and willingness to learn. I would welcome the opportunity to discuss how my background and skills can support your team.

Thank you for your time and consideration.

Sincerely,
Joel Chandra Paul
