1 Introduction

This project is for the ABC Restaurant HCM project. It provides an overview of the project's goals, scope, and expected outcomes, ensuring all stakeholders have a shared understanding of its direction.

1.1 Purpose

The purpose of this document is to define why the ABC Restaurant HCM system is being developed. It addresses the lack of affordable, simple tools for small restaurants to manage scheduling and payroll, and ensures all project members align on objectives and deliverables.

1.2 Scope

The scope of this project is to design and implement an HCM system tailored for small to medium-sized restaurants. The system will centralize payroll, scheduling, employee availability, and shift management into a single platform.

1.2.1 In Scope

- Employee scheduling and payroll management in one application.
- Employee access to schedules, availability submission, shift swaps, and time-off requests.
- Manager tools for automated schedule generation.
- Expense reimbursement submission and approval.
- Delivery of an application prototype with documentation and report

1.2.2 Out of Scope

- Enterprise-level features designed for large corporations.
- Integration with third-party enterprise HCM platforms like Dayforce.
- Advanced analytics or AI-based workforce optimization beyond the project prototype.

1.3 Definitions, Acronyms, and Abbreviations

Term	Explanation
HCM	Human Capital Management – software that manages employee data, payroll, scheduling, and HR functions.
ABC Restaurant HCM	The proposed project solution for small restaurant workforce management.
SME	Small and Medium-sized Enterprises – the target users of this project.
Payroll	The process of managing employee wages, salaries, and related deductions.
Scheduling	Allocation of employee shifts based on availability and business needs.
Prototype	An early model of the application demonstrating system features.

2 Positioning

2.1 Business Opportunity

There is a growing need for small restaurants to manage their employees efficiently without investing in expensive enterprise-level HCM systems. This project offers an affordable, user-friendly platform that streamlines scheduling, payroll, and communication, reducing administrative workload for managers

2.2 Problem Statement

The Problem of	Modern HCM software being too complex or expensive for small businesses.
affects	Small restaurants and their management staff.
the impact of which is	Managers spend excessive time manually scheduling and managing payroll using Excel and emails.
a successful solution would be	A cost-effective, easy-to-use HCM system enabling streamlined scheduling, payroll integration, and employee requests.

Table 1 Problem Statement

2.3 Product Position Statement

For	Small and medium restaurant managers and employees
Who	Need an affordable and simple solution to manage payroll and schedules
The <product name>	ABC Restaurant HCM
That	Centralizes payroll, scheduling, and employee requests in one application
Unlike	Enterprise HCM tools (e.g., Dayforce) that are costly and overbuilt
Our product	Provides a budget-friendly, user-focused solution designed specifically for SMEs

Table 2 Product Position Statement

2.4 SWOT Analysis

<Reference: <https://www.businessballs.com/strategy-innovation/swot-analysis/>>

Strengths	Weaknesses
Affordable alternative to enterprise HCM software	Limited functionality compared to high-end enterprise tools
Simple and user-friendly interface	May lack advanced analytics

Tailored for small businesses	Prototype stage may limit adoption
Opportunities	Threats
High demand from SMEs lacking affordable HCM tools	Competition from established HCM providers
Potential to scale features for broader markets	Risk of adoption resistance from managers used to Excel/manual methods
Expanding to other service industries	Security and compliance concerns

3 Stakeholder and User Descriptions

3.1 Stakeholder Summary

Stakeholder Name	Represents	Role
Restaurant Manager	Daily schedule and HR manager	<i>Responsible for scheduling ,approving day offs and reimbursement requests.</i>
Restaurant Employee	System user	<i>Will use the system to send availability, various requests to be approved by the restaurant manager, receive shift notifications and view schedules.</i>
Finance	Company finance/HR	<i>Responsible for creating the wage and compliance rules that the system will use when generating schedules and payroll reports.</i>
System admin support	System support team	<i>Manages the system from the companies side, ensuring server health and proper use of the system.</i>

Table 3 Stakeholder Summary

3.2 User Summary

User Name	Description	Responsibilities	Stakeholder
Employee	Waiters, chefs, and other hourly staff	<i>Submit availability, request shift swaps, request time off, submit expense receipts, view schedules and payroll information</i>	Employees

User Name	Description	Responsibilities	Stakeholder
Manager	Restaurant Manager	<i>Create, update, and publish schedules; approve or deny time-off and reimbursement requests; monitor operations</i>	Restaurant Manager
Finance	Finance/HR staff	<i>Calculate salaries, process payroll, approve expenses, generate financial reports and exports</i>	Finance/HR staff
System admin	IT	<i>Configure, maintain, test, and support the web/mobile application</i>	System admin support

Table 4 User Summary

4 Stakeholder Requirements

ID	Requirement	Stakeholder
01	System must support user accounts management and permission categories	System admin support
02	The system must provide exporting functionality(PDF/EXCEL).	Finance
03	The system must support employees to submit their day off and receipt application.	Restaurant Employee
04	The system must support managers to approve expenses, shift changes and leave.	Restaurant Manager
05	The system must support the web/app to auto make schedule and no conflict	Restaurant Manager

Table 5 Stakeholder Requirements

5 System Features

ID	Feature	Stakeholder Requirement ID
01	User account and permission management	01
02	Export payroll and schedules to PDF/Excel	02
03	Employee submission of availability, leave, and receipts	03
04	Manager approval of shifts, leave, and expenses	04
05	Automatic schedule generation based on availability	05

Table 6 System Features

6 Assumptions

- Employees have basic digital literacy to use web/mobile app.
- Internet access is available in the restaurant environment.
- Management staff will provide accurate employee data and payroll information.
- Prototype delivery will be sufficient for evaluation and feedback.

7 Constraints

- No integration with enterprise-level HCM tools.
- Limited budget and timeframe restrict advanced analytics or AI features.
- System must comply with basic security and privacy regulations for employee data.
