

Project Summary

Company Name/ Team Name	ABC Company								
Company Address	(if applicable)								
Company Website	(if applicable)								
Telephone	(if applicable)								
Company Contact/ Team member names	Yueyang Peng Joel Chandra Paul Jingyu He Charles Langmuir								
Title	(if applicable)								
Company Email/ Email address for all team members	charles.langmuir@georgebrown.ca yueyang.peng@georgebrown.ca jingyu.he@georgebrown.ca Joel.ChandraPaul@georgebrown.ca								
Telephone									
Project Title	ABC Restaurant HCM								
Project Description	<u>About the company:</u> We are a software development team with a background in the service industry, providing the industry with affordable and effective solutions in restaurant management. <u>About the project:</u> ABC Restaurant HCM aims to provide smaller companies who cannot afford enterprise level HCM software an inexpensive and user friendly solution, saving time for salaried management level employees, without a big cost overhead.								
Problem/ Opportunity Assessment *	<i>Please describe current state problem/opportunity that describes the nature and extent of the problem (factual, quantified, concise), or that outlines a chance for advancement or progress.</i> <table border="1"> <tr> <td>1.</td><td>Modern human capital management software lacks simplicity and streamlined display of important and relevant information</td></tr> <tr> <td>2.</td><td>Most effective HCM software is geared towards large enterprise level companies with hundreds to thousands of employees</td></tr> <tr> <td>3.</td><td>Smaller companies often pay for payroll software like payworks, but do their scheduling and shift management manually</td></tr> <tr> <td>4.</td><td>Most smaller companies send out schedules over email using excel sheets, with the management manually scheduling all of their employees week by week</td></tr> </table>	1.	Modern human capital management software lacks simplicity and streamlined display of important and relevant information	2.	Most effective HCM software is geared towards large enterprise level companies with hundreds to thousands of employees	3.	Smaller companies often pay for payroll software like payworks, but do their scheduling and shift management manually	4.	Most smaller companies send out schedules over email using excel sheets, with the management manually scheduling all of their employees week by week
1.	Modern human capital management software lacks simplicity and streamlined display of important and relevant information								
2.	Most effective HCM software is geared towards large enterprise level companies with hundreds to thousands of employees								
3.	Smaller companies often pay for payroll software like payworks, but do their scheduling and shift management manually								
4.	Most smaller companies send out schedules over email using excel sheets, with the management manually scheduling all of their employees week by week								
Desired Project Outcomes/ Requirements*	<i>Define how this project shall address a business need, e.g. the business problem or opportunity described above; describe what the beneficiary must be able to do / receive from the solution</i> <table border="1"> <tr> <td>1.</td><td>The project will provide companies with the ability to keep all scheduling and payroll information on one singular application</td></tr> <tr> <td>2.</td><td>The project will give employees simplicity in providing availability, getting shifts changed/asking for days off, viewing their weekly schedules and who they will be working with</td></tr> </table>	1.	The project will provide companies with the ability to keep all scheduling and payroll information on one singular application	2.	The project will give employees simplicity in providing availability, getting shifts changed/asking for days off, viewing their weekly schedules and who they will be working with				
1.	The project will provide companies with the ability to keep all scheduling and payroll information on one singular application								
2.	The project will give employees simplicity in providing availability, getting shifts changed/asking for days off, viewing their weekly schedules and who they will be working with								

	3.	The software will provide a more inexpensive option to software like Dayforce HCM, which most smaller companies struggle to afford, opting to create more work for salaried management
	4.	Allow management to procedurally generate schedules based on employee availability
	5.	Allow employees to post receipts and request reimbursement for work related expenses paid for by employees
Key Deliverables to be produced by students*	<i>Define the boundaries of work that you expect to receive from the students effort (vs. internal effort)</i>	
	1.	An application prototype containing all project outcomes
	2.	Extensive technical and user documentations explaining system features
	3.	A report summarizing problem analysis, implementation and outcomes
Desired Start Date	Monday, September 15, 2025	
Desired End Date	Friday, March 27, 2026
